ENVIRONMENTAL POLICY

APPROACH

Our approach to Environmental Management is based on identification, assessment and control of all operations. We are committed to high ethical business practices and government standards. We aim to avoid, or where not possible, minimise our impacts, while contributing to lasting environmental benefits.

AVOIDING ENVIRONMENTAL IMPACTS

Only using/purchasing timber products FSC certified.
Only using products with VOC's above E1.
Recycle products wherever possible.
Offering a 'whole of life cycle' service.

ENVIRONMENTAL INITIATIVES

Maximising consumption of raw materials.
Minimising energy consumption by utilising natural light.
Sourcing products made of sustainable forest hardwoods.
Shipping of goods in bulk and KD.
Recycling and general waste management.
Use of recyclable fabrics certified low VOC by ETEC.

RESPONSIBLE PRACTICES

Environmental life-cycle assessments.
Environmental supply chain practices review.
Green supply chain management initiatives.
Cleaner production practices.
E0/E1 manufactured board for workplace products.
Environmental criteria for supply chain selection.
