

Whale Seat Cushion

The design of the Whale Seating Cushion takes its cue from the gentle curves of a whale. The upturned ends beautifully reflect the sleek shape of the creature, while the seat surface features a pattern inspired by the whale's belly stripes. The result is a cushion with a truly unique look and a strong sense of style.

Perfectly suited for a wide variety of interior spaces, including breakout and seating areas across workplace, commercial, healthcare, hospital, and education sectors.
